External Data Request Form

Data request data entry

IRB v Data Request

Warning

*You are about to begin the submission process for student and/or pedagogue level data from the NYC Department of Education. **Please note that this is NOT the same as submitting an IRB proposal for review.** IRB submissions are separate and different from the Data Request form you are about to begin.*

*Research directly involving human subjects must first be approved by the IRB. If your work will **only** rely on using administrative student or pedagogue data, you do not need to submit your research for IRB approval.*

If you have any questions about if you need to submit an IRB proposal, please contact IRB@schools.nyc.gov.

If you have questions about submitting a Data Request, please contact RPSGResearch@schools.nyc.gov.

External Data Request Page

Instructions

If you are planning a research study or evaluation that will use NYC DOE student-level data, you must request the data through the Research and Policy Support Group's (RPSG) External Data Request System. School or network staff cannot provide data to external researchers. Please note that research directly involving human subjects must first be approved by the Institutional Review Board.

We strongly encourage researchers to first explore the school-level data already publicly available. This page contains links to data on graduation outcomes, Math and ELA tests, Progress Reports, demographics, and the New York State Report Cards (which includes information on enrollment, attendance, suspensions, dropouts, teachers, etc.)

Approval of requests are based on the completeness of the data request, expected educational value or benefit provided to the NYC education community as a result of the study, the availability and regulations governing access to data, and the amount of staff time and other DOE resources required to execute the request. Processing time will vary depending on the complexity of the request, the volume of prior requests, and competing priorities. Researchers who have received data from the DOE are expected to provide final reports of all research projects back to the DOE.

The most recent data available is for the prior completed school year (currently up through the 2015-16 school year). External data requests are only approved for data available at the time of the request. Data for the current school year is typically not available until the following fall. External requestors must re-submit their Data Request form and specifically outline the data they are requesting for the just completed school year. For example, a requestor would need to re-submit their request for data from the 2012-13 school year after the fall of 2013.

Data Requests from organizations or researchers hired by or directly working on the behalf of the NYC Department of Education must provide a contact to confirm this collaboration. You will be asked to provide the contact's office, title, name, email address, and phone number.

Requesting data may require the completion of a Non-Disclosure Agreement (NDA), which will be emailed to the requestor after the approval of their scope of work.

Once the scope of work is approved and the NDA is completed, data requestors are also responsible for ensuring a secure file transfer system such as an FTP server. Most IT departments can typically provide this service.

At no point will you need to upload or list ANY student information in this form. This includes any student names, IDs, completed consent forms or other information related to students.

If you have any questions, please contact RPSGResearch@schools.nyc.gov.

New Request or Continuation

Is this a new data request?

Yes

If this is part of a data request you submitted previously, please select "No."

If this is a continuation of a prior request that was submitted using this web system, please provide the data request number.

No answer provided.

The data request number looks like "DR-11-NYC". If you have a continuing request but did not submit your request using the web system, please keep blank.

Contact Info

All fields are required responses; the form cannot be submitted if any field is left blank.

Submitter's Name

Entered: 01/26/17 **By:** Riederer, Christopher James PhD

My columbia email address is mani@cs.columbia.edu or cjr2149@columbia.edu

Riederer, Christopher James PhD

Email: OfficialChrisEmail@gmail.com

Business: 5072695953

1. Name(s) of Researcher(s):

Christopher Riederer
Augustin Chaintreau

1. Name of Study:

Algorithmic Fairness in Government Matching Processes

Only one research proposal may be submitted at a time.

1. The organization or institution you are affiliated with:

Columbia University

Address of researcher or institution:

Mudd Building
500 W 120th St
New York, NY 10027

*Please list Name, Street
Address, City, State, Zip Code, Phone
Number*

Data Request Type

Does this request include personally identifiable information on students?
This may include any of the following or combinations of the following: First Name, Last Name, Student ID, street address, or date of birth.

No

Only researchers who have parental consent, who are working on behalf of the NYC Department of Education, or were hired directly by a school may have access to identifiable student data.

Research Info

- 1. If you are an external evaluator, the organization, office, school, or other institutions you are working on behalf of or were hired by: *This may be left blank***

No answer provided.

Only complete if you were hired by or partnered with another entity.

What are your research objectives and the purpose of the study?

The New York City Department of Education has a large challenge in efficiently and fairly placing students into high schools. The Department has used a large-scale matching algorithm which has been successful; 92% of students are matched and 85% are assigned to one of their top five choices. At the same time, New York City schools are highly racially segregated, with around half of all schools having a student body that is over 90% black and Latino. The goal of this work is to understand the root causes of this segregation. For example, are the rank lists of students self-selecting into racially homogenous schools? What is the impact of geography on student choice, and does the impact diverge across different demographic groups? Are there particular decision criteria associated with more or less segregation?

Beyond understanding, the researchers will examine the impact of recently developed algorithms that seek to reduce bias across different groups. After applying these "de-biasing" algorithms, we will examine the impact on global utility. Is there a large impact on school assignments after de-biasing? Would these tweaked assignment schemes substantially change the number of students who receive their top 5 choices? What will the impact be on the schools: will there be a small or drastic change in assignments of the students the schools have ranked highly?

The overall objective of this work is first and foremost add new information to the discussion of the the High School Admissions Process.

What is your research hypothesis and methodology for this work?

To conduct this research, we will need several pieces of information.

1. The rank lists and assignments of students who entered the High School Admissions Program. We do NOT require any personally identifiable information about students, but it would be helpful to have this data associated with an anonymous unique ID.
2. Biographic dataset files for the anonymous students. Namely, we would like to have ethnicity information about anonymized students. Anonymized home location data would additionally be useful (at a neighborhood or multiblock level) but is not necessary.
3. If available, normalized information about the admissions criteria or requirements associated with each school.

Given this data, the researchers will test a variety of hypotheses:

- * What is the impact of geography on rank lists? Do students apply to schools clustered in one area? Is there a difference in this across ethnicities, neighborhoods, or income levels?
- * Do different demographics rank schools differently? Are certain groups not ranking high quality schools, for fear of not being accepted or a misunderstanding of the match process?
- * What is the average school quality (as measured by the DoE in terms of student achievement) of schools on the rank lists of different demographic groups?

We will additionally adapt a fairness algorithm (see Dwork et al. "Fairness through awareness." Proceedings of the 3rd Innovations in Theoretical Computer Science Conference. ACM, 2012.) and apply it to the match data. We will examine the impact on:

- Schools: do schools receive substantially fewer of the students they ranked highly?
- Students: what is the impact on number of students matched and average rank of assignment?
- Segregation: does the algorithm actually decrease levels of segregation in NYC high schools?

1. What is your timeline for this work? Please describe key research activities and an estimated completion date.

I believe the maximum amount of time required to conduct this work is two months.

- Processing, cleaning, and developing initial understanding of the data (such as descriptive statistics) will take approximately one week.
- Analyzing impact of geography upon rank lists should take two weeks. We will look at geographic clustering behaviors of rank lists, determining if these are different for different demographic groups.
- Analyzing the average school quality of schools on the rank list by demographic group will take another week.
- The remainder of time (one month) will be spent on adapting and running a fairness algorithm on top of a matching algorithm.

Please provide a brief statement of the risks and benefits of the research.

There are a variety of benefits to this work. We hope that our work could help inform the Department of Education on the behavior of students entering the High School Admissions Process. Our work should help show how students are making their decisions, which in turn could help the Department of Education in their communication with students, parents, schools, and other stakeholders.

As more of modern society becomes governed by algorithmic decision-making, there is more risk of "algorithmic bias" creeping into the process. Recently, "fairness" or "de-biasing" processes have been proposed as counters to algorithms with societally undesirable results. However, these fairness processes have not been tested out in practice. This work would be one of the first attempts to move this work into the real world, analyzing if the results are practical or if they cause too much of degradation in overall utility to be effective.

Given that this research does not require the use of personally identifiable information, and that no test subjects will be involved, we find there to be minimal risks.

Please provide a description of how the data will be used and the intended audience(s) for the findings.

As described in the methodology section, we will use the data to answer the following questions:

- * What is the impact of geography on rank lists? Do students apply to schools clustered in one area? Is there a difference in this across ethnicities, neighborhoods, or income levels?
- * Do different demographics rank schools differently? Are certain groups not ranking high quality schools, for fear of not being accepted or a misunderstanding of the match process?
- * What is the average school quality (as measured by the DoE in terms of student achievement) of schools on the rank lists of different demographic groups?

The data will be analyzed using code custom-written by a computer science PhD student at Columbia University. This will produce a variety of graphs and summary statistics illustrating the results of our work.

There are two intended audiences for our findings. We would like to share any interesting findings with the Department of Education. Our results should help them better understand the behavior of applicants within the High School Admissions Process. If through our work on algorithmic fairness we obtain interesting results (whether positive or negative), we would like to share our results with the academic computer science community. This sharing will be done in the form of a paper which will not require the disclosure of any private data.

You must provide a detailed description of the data security plan to ensure protection of student and employee information including but not limited to data encryption, security of the transmission process, and provisions to prevent unauthorized access.

We do not require personally identifiable information. All sensitive Department of Education data will be kept in an encrypted format on a computer located behind several locked doors in Columbia University. The data on this computer will only be accessible by me, who can log in using a password and private key. Security audits are regularly conducted by teams of experts at Columbia to insure that all computers (including the one that will be used) are not accessible by bad actors.

There are a variety of ways we can insure a secure transmission process. Being located in New York, we could provide a city government regulation compliant hard drive to physically move the data. Otherwise, the Columbia University Information Technology team has experience dealing with secure data transfers of this kind will assist.

Please provide details on the data transmission including server address and log in credentials.

Upon this request being approved, we are happy to set up an FTP server with the help of Columbia University Information Technology, or to physically provide a hard drive to the DoE.

All data on students is considered confidential. Data must be encrypted and the computers accessing the data as well as the data transmission must be secure. This means you will need to provide a secure electronic delivery method for the data. Typically, most people set up and provide log-in information for an FTP server.

Please provide an explicit timeline and description of how the data will be destroyed.

We hope to present our work as an academic publication in the computer science community. After presenting our work, we would like to retain the data for a period of time in order to answer and analyze follow-up questions that our presentation may generate. Thus, we would like to keep the data for up to one year after publication. After this period of time, we will delete the data from the secure server at Columbia, using a secure deletion program such as the unix commands "shred" or "wipe".

This should indicate the length of time you wish store copies of the data used for your work and what processes you will use for ensuring the destruction of this data.

Data Details

Please provide a general description of your data needs. You will be asked to explain in more detail in the following questions on this page.

To conduct this research, we will need several pieces of information.

1. The rank lists and assignments of students who entered the High School Admissions Program. We do NOT require any personally identifiable information about students, but it would be helpful to have this data associated with an anonymous unique ID.
2. Biographic dataset files for the anonymous students, associated with the aforementioned anonymous unique ID. Namely, we would like to have ethnicity information about anonymized students.
3. (Optional) Anonymized home location data associated with the anonymous unique ID would additionally be useful (at a neighborhood or multiblock level) but is not necessary.
4. (Optional) If available, normalized information about the admissions criteria or requirements associated with each school.

Which school years of data are you requesting? Check all that apply

Entered: 01/26/17 **By:** Riederer, Christopher James PhD

We do **not** need all of the years requested. Any of these years would work. Ideally we would like multiple years of match data to see if student behavior has changed over time.

2015-16
2014-15
2013-14
2012-13
2011-12
2010-11
2009-10
2008-09
2007-08
2006-07
2005-06

Data before the 2004-05 school year is available but is limited and can be unreliable.
Data before the 2000-01 school year is available in an extremely limited capacity and will significantly increase the amount of time to complete the request. If you are requesting date from before 2000-01, please include the additional years in the question "Please provide an explanation for requesting data for these school years" below.

Please provide an explanation for requesting data for these school years.

We do **not** need all of the years requested.

At a minimum, we need match data (as described in the previous question) for one year, from any of the years selected above.

It would, however, be desirable to have data over several years to see if student ranking behavior has changed over time. For example, it might be interesting to have years 2005-2006, 2010-2011, and 2015-2016, analyzing if rank lists have change during these times.

Please select the grade levels for which you want data.

7th Grade
8th Grade
9th Grade
10th Grade
11th Grade
12th Grade

Please provide an explanation for selecting these grade levels.

It would be good to see scores for students both pre- and post- match. This can let us see if students are accurately evaluating themselves before deciding on a rank list.

A smaller subset that could be used would be just data for 8th grade and 12th grade.

Please select the universe of students to include for this request.

Please provide an explanation for selecting each of these schools (or all schools).

We would like to our study to encompass all New York City public schools.

Please select from the list below the data types you are requesting.

Student Demographic Data --- School DBN,
 Grade Code, Grade Level, Gender, Ethnicity,
 Home Language, Birthplace, ELL Status,
 Special Education Status, Year of Birth
 Student NY State Math and ELA --- Test Year,
 Test Accommodations, ELA/Math Raw Score,
 ELA/Math Scale Score, ELA/Math Performance
 Level, ELA/Math Proficiency Level
 Student Regents --- Test Year, Term Code,
 Exam Code, Mark
 Student Graduation --- Graduation Cohort,
 Student State ID, Graduation Outcome,
 Diploma Type
 Student Attendance --- Fall Days Present,
 Fall Days Absent, Spring Days Present,
 Spring Days Absent

The "Student Courses and Grades" is a very large and complex data set that can be challenging for researchers. Schools have historically been allowed to enter the names and codes for courses as they wish and this can be difficult to work with.

We do offer a simpler data set, "Student Credits Passed and Attempted", which we encourage most people interested in course data to consider. These files are by year of the overall high school credits that were attempted and earned by subject area for each student.

Please specify if you selected "Other" above.

No answer provided.

Please provide an explanation for how each of the Data Types selected above supports your work.

We do **not** require all files listed above to have a successful project. At a minimum we would need the "Student Demographic Data".

Student Demographic Data would be used to associate rank list behavior with demographics, such as ethnicity, home language, birthplace, or ELL status.

Additional data would be used for the following:

- * Student NY State Math and ELA data: used to see how student performance correlates with rank list behavior, or if some successful students in retrospect should have ranked more competitive schools higher..

- * Student Regents: used to see how student performance correlates with rank list behavior, or if some successful students in retrospect should have ranked more competitive schools higher..

- * Student Graduation: used to understand if certain ranking behaviors are associated with different outcomes, or if some successful students in retrospect should have ranked more competitive schools higher.

- * Student Attendance: used to understand if certain ranking behaviors are associated with different outcomes, or if some successful students in retrospect should have ranked more competitive schools higher.
